

SCHOLARION ACADEMY

Professional Certificate in Agentic AI Systems

DRAFT — NOT OPEN FOR ENROLLMENT

20 weeks total; 2 ten-week courses. Lead faculty: Dr. Martins Donbruce Idahosa. Biography pending.

Python required.

Fees, start dates and live schedules are unconfigured. Sandbox only; no real payments. No CEUs or employment guarantees.

Learning outcomes

Justify bounded agent autonomy against a non-agent baseline.

Implement grounded retrieval and retry-safe tool contracts.

Compare planning, memory and multi-agent designs using test evidence.

Evaluate reliability, bias, permissions and human-review controls.

Defend a monitored system and a recoverable deployment plan.

Projects and final review

Synthetic credit-review recommendation dossier. Educational simulation only: synthetic applicant audit, protected-attribute bias tests, reason-code review and an explicit human-underwriter decision. Never make a final credit decision.

Problem and assumptions: 15 points (proposed)

Artifact and reproducibility: 25 points (proposed)

Evaluation evidence: 25 points (proposed)

Human oversight and risk: 25 points (proposed)

Defense and communication: 10 points (proposed)

P01-B1 — Agent foundations

Ten-week course design; teaching materials require academic review.

Week 1: Bound autonomy before building

Produce and explain an evidence artifact for: bound autonomy before building.

Week 2: Measure model cost and context

Produce and explain an evidence artifact for: measure model cost and context.

Week 3: Specify instruction and output contracts

Produce and explain an evidence artifact for: specify instruction and output contracts.

Week 4: Make tools retry-safe

Produce and explain an evidence artifact for: make tools retry-safe.

Week 5: Retrieve from a traceable corpus

Produce and explain an evidence artifact for: retrieve from a traceable corpus.

Week 6: Route questions to supporting evidence

Produce and explain an evidence artifact for: route questions to supporting evidence.

Week 7: Compare bounded planning loops

Produce and explain an evidence artifact for: compare bounded planning loops.

Week 8: Budget and expire agent memory

Produce and explain an evidence artifact for: budget and expire agent memory.

Week 9: Reconcile two synthetic evidence sources

Produce and explain an evidence artifact for: reconcile two synthetic evidence sources.

Week 10: Defend the foundation build

Produce and explain an evidence artifact for: defend the foundation build.

P01-B2 — Production multi-agent systems

Ten-week course design; teaching materials require academic review.

Week 1: Route between small and hosted models

Produce and explain an evidence artifact for: route between small and hosted models.

Week 2: Coordinate workers and reviewers

Produce and explain an evidence artifact for: coordinate workers and reviewers.

Week 3: Compare explicit orchestration patterns

Produce and explain an evidence artifact for: compare explicit orchestration patterns.

Week 4: Constrain protocol tools and identities

Produce and explain an evidence artifact for: constrain protocol tools and identities.

Week 5: Review agent-assisted repository changes

Produce and explain an evidence artifact for: review agent-assisted repository changes.

Week 6: Calibrate evaluation against human judgments

Produce and explain an evidence artifact for: calibrate evaluation against human judgments.

Week 7: Trace failures and hostile inputs

Produce and explain an evidence artifact for: trace failures and hostile inputs.

Week 8: Rehearse deploy and rollback

Produce and explain an evidence artifact for: rehearse deploy and rollback.

Week 9: Audit a synthetic lending recommendation

Produce and explain an evidence artifact for: audit a synthetic lending recommendation.

Week 10: Defend the multi-agent evidence package

Produce and explain an evidence artifact for: defend the multi-agent evidence package.

Delivery and release status

Transfer and non-duplication mappings remain proposed; no automatic credit.

Certificate: Scholarion Academy Certificate of Completion. Badge issuance remains disabled pending approved completion rules.

Learning hours: [160, 200] estimated

Tool versions, educational licenses and faculty support capacity are unverified. No third-party affiliation or endorsement is implied. Use synthetic or licensed data only.

Complete original lessons, slide scripts and licensed readings

Executable starter and instructor notebooks with synthetic data cards

Validated quizzes, assignments and scoring policies

Confirmed tool versions and educational licenses

Faculty biography, delivery schedule and support capacity

Approved finance, completion and academic publication configuration

Contact the Academy through local Support. Advisor scheduling, financing, refunds and cohort deadlines require configuration. This brochure is generated from the same design data as the program preview.
