

SCHOLARION ACADEMY

Certificate in Designing & Building AI Products and Services

DRAFT — NOT OPEN FOR ENROLLMENT

10 weeks total; 1 ten-week courses. Lead faculty: Dr. Martins Donbruce Idahosa. Biography pending.

No coding background required.

Fees, start dates and live schedules are unconfigured. Sandbox only; no real payments. No CEUs or employment guarantees.

Learning outcomes

Match learning methods and neural architectures to a justified product problem.

Validate data, cost and technical assumptions in a product design.

Assess retrieval and tool-using agents for fit and failure risk.

Design accessible human oversight and error recovery.

Pitch an evidence-based business case and implementation roadmap.

Projects and final review

Product brief and stakeholder pitch.

Problem and assumptions: 15 points (proposed)

Artifact and reproducibility: 25 points (proposed)

Evaluation evidence: 25 points (proposed)

Human oversight and risk: 25 points (proposed)

Defense and communication: 10 points (proposed)

P12-B1 — AI product design

Ten-week course design; teaching materials require academic review.

Week 1: Frame a problem worth solving

Produce and explain an evidence artifact for: frame a problem worth solving.

Week 2: Choose a learning method for a product need

Produce and explain an evidence artifact for: choose a learning method for a product need.

Week 3: Compare neural architectures and data demands

Produce and explain an evidence artifact for: compare neural architectures and data demands.

Week 4: Specify consent and provenance for generated media

Produce and explain an evidence artifact for: specify consent and provenance for generated media.

Week 5: Prototype a grounded information assistant

Produce and explain an evidence artifact for: prototype a grounded information assistant.

Week 6: Choose an agent interaction pattern

Produce and explain an evidence artifact for: choose an agent interaction pattern.

Week 7: Storyboard control and error recovery

Produce and explain an evidence artifact for: storyboard control and error recovery.

Week 8: Design a human and machine operating model

Produce and explain an evidence artifact for: design a human and machine operating model.

Week 9: Test economics and societal risk assumptions

Produce and explain an evidence artifact for: test economics and societal risk assumptions.

Week 10: Pitch a responsible product proposal

Produce and explain an evidence artifact for: pitch a responsible product proposal.

Delivery and release status

Transfer and non-duplication mappings remain proposed; no automatic credit.

Certificate: Scholarion Academy Certificate of Completion. Badge issuance remains disabled pending approved completion rules.

Learning hours: [60, 60] estimated

Tool versions, educational licenses and faculty support capacity are unverified. No third-party affiliation or endorsement is implied. Use synthetic or licensed data only.

Complete original lessons, slide scripts and licensed readings

Executable starter and instructor notebooks with synthetic data cards

Validated quizzes, assignments and scoring policies

Confirmed tool versions and educational licenses

Faculty biography, delivery schedule and support capacity

Approved finance, completion and academic publication configuration

Contact the Academy through local Support. Advisor scheduling, financing, refunds and cohort deadlines require configuration. This brochure is generated from the same design data as the program preview.
